Not since the days of Monroe's admin istration has the country seen such an abandonment of party feeling, North and South, as is now to be seen in the manifestations of public sentiment towards President Hayes. He possesses the popular respect and confidence to a wonderful degree, and the secret is that men of all shades of political opinion believe that he is striving with all the sincerity of a truly honest man to give the country not only a national but likewise a purified and elevated administration of the Gov-

The people believe that Hayes is seeking no personal or partisan end in his previous life is pure and unspotted, and at both in peace and war he has always had the reputation of being a true man, who never shirked the responsibilities that were laid upon him. This well esthe explanation of his popularity.

WE are indebted to our triend Mr. H. of the Westliche Post, Carl Schurz's paper, containing an important statement from Dr. Praetorius, the editor. Among Gail Hamilton's many loose statements against the people she despises, because they are not friends of Mr. Blaine, was that Mr. Schurz had received more than \$24,000 for "two years of political camcharge and offers to give \$10 for every above \$6,000, during the whole twenty-1856 io 1877, as compensa continues the German editor, "I mean \$6,000 gross receipts in money, including every payment to him from any commitlocal, without deducting as an offset a or other outlays or payments for political purposes, such as contributions for printng or for the support of Republican papers and other similar things, which in the aggregate I know to have cost him much more than he ever received." It is not probable that she will do either.

Business prospects are brightening.

The dry goods, grocery, and hardware trades, the past week, have been quite satisfactory; all these trades carry stocks only from hand to mouth, but the consumption in the end promises to be large, at of course small profits. Many Eaglish visitors are here with the same object. Nothwithstanding the weather is rainy a great crowd has already collected outside his late residence in the Place St. George and adjoining streets. NEW YORK, September 8.—A special to the Hereld, from Salt Lake City, says: "Nise of the twelve apostles who control the destines of the Church of Latter Day Saints, and who unlike their predecessors of old have a very keen eye for temporal as well as spiritual matters, have been engaged during the past two or three days in looking over the deceased President's accounts.

This peculiar weakness of Brigham in his lifetime is likely to be followed, now that he is dead, by some very interesting developments. The estate of the Prophet will be sworn under \$2,000,000, and it is currently reported that extensive litigations are likely to grow out of the church, as interpreted by himself, were varied and striking, and among other things involved the holding of the church, as anuch head, while, by the some arrangement or understanding law in the matter, and lay claim to all the property the title of which was in their father, whether as citizen or seer. This is likely to lead to endless suits by parties thinking themselves aggrieved, and by the time the courts get through with them it is probable the estate will be largely pared down.

with them it is probable the estate will be largely pared down.

THE PRESIDENCY.

The belief is becoming general here that there will be no election of President of the church at the conference, which meets on the 6th of October next, as has been anticipated. With all of their profound respect for and subserviency to Brigham Young, it is evident that the church authorities have had enough of the desporism which he exercised, and have no disposition to place it in the hands of another. While it is difficult to understand the theory of the church government, which Brigham was in the habit of interpreting for himself and for his own purposes, it is certain that the twelve have power to exercise supreme control; and, with all their love for the methods of ancient times, there remains among them sufficient of the leaven of self-government to prevent entire submission to another autocrat."

Movement of Mexican Troops.

New Yoar, September 9.—A special from San Antonio says that 1,600 regular Mexican troops are about embarking on the steamer City of Merids from Yera Cruz to the mouth of the Rio Grande for service on the Rio Grande frontier to replace the military. These troops will probably be commanded by Gen. Gonzales. The object of the expedition is to place a reliable military force on the line of the Rio Grande, the local authorities being so independent of federal control and blitterly hostile to Americans that they cannot be used by the President to enforce the terms of the extradition treaty between the United States and Mexico.
